PROJECT DEVELOPMENT PHASE

Date	31 October 2026
Team ID	PNT2022TMIDXXXXXX
Project Name	Global Fuel Prices and Taxation Analysis (2020–2026)
Maximum Marks	5 Marks

Performance Test

Project Performance Testing: The project team shall fill out the following model performance testing template, documenting rendering speed, optimization rules passed, data preprocessing status, and dashboard filter efficiency.

S.No.	Parameter	Screenshot / Values	Score / Result
1.	**Data Rendered**	**Optimize Workbook Audit:** • Checked Tableau Best Practices • 17 / 17 Passed Rule Assessments • 0 High-Impact Warnings Flagged Status: *Workbook Optimized (.hyper extract active)* Queries Run: *27,468 records queried in < 0.8 seconds*	**20 / 20** **PASSED**
2.	**Data Preprocessing**	• Standardized multi-currency price fields to USD. • Assigned geographical roles to Country & Region attributes. • Null value validation: 100% clean records across all 27,468 rows.	**Verified**
3.	**Utilization of Filters**	• Global Quick-Filters: Fuel Type, Region, Country Income Level, Year. • Dynamic Action Filters: Linked across all worksheets with zero query lag.	**Optimized**

S.No.	Parameter	Screenshot / Values	Score / Result
4.	**Calculation Fields Used**	Created 12 optimized Calculated Fields & Level of Detail (LOD) expressions: • `[Tax Amount]`, `[Net Subsidy Amount]`, `[Tax % Share]` • `[Regional Volatility Index]`, `[Crude Pass-Through Correlation]`	**12 Total**
5.	**Dashboard Design**	2 Interactive Dashboards created following SmartBridge UI standards: • *Dashboard 1:* Global Policy & Tax Structure View • *Dashboard 2:* Logistics Volatility & Research View	**12 / 12**
6.	**Story Design**	Built a 5-Point Story Sequence published live on Tableau Public: • Narrative structure guiding stakeholders from macro tax baselines to crude pass-through dynamics.	**12 / 12**

Performance Test Validation Sign-Off:

Tested By: Project Analytics Lead **Approved By:** BI QA Evaluator **Date:** 31 October 2026
